SAFETY
ON EVERY
ROAD

1. Emergency Brake Assist – BA

Automatically detects emergency braking, enhances brake force & shortens brake distance

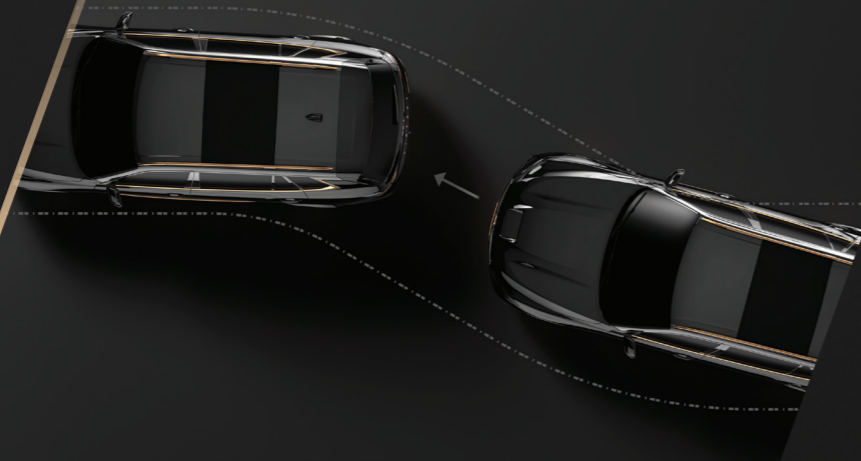

3. ELECTRIC BRAKE DISTRIBUTION SYSTEM - EBD

Uses electronic sensors, distributing brake force to each wheel to maximize stopping power while maintaining vehicle control

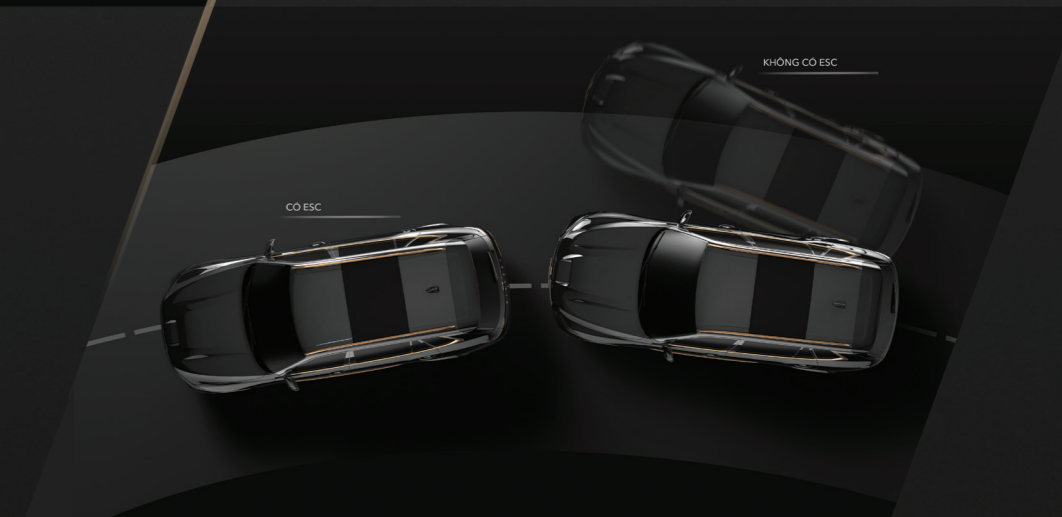

2. Anti-lock Braking System - ABS

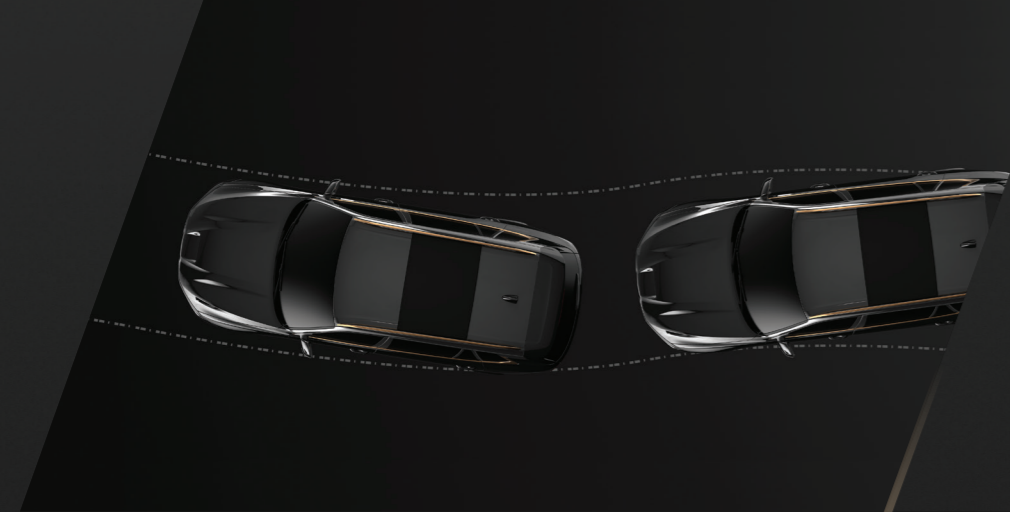

Prevents wheel locking, shortens brake distance & increases steering accuracy to avoid obstacles

4. ELECTRONIC STABILITY CONTROL – ESC

Automatically rebalances the braking system and reduces the vehicle's engine power, preventing the car from slipping or fish tailing when turning corners at high speeds

6. HILL DESCENT CONTROL SYSTEM - HDC

Automatically interferes with the engine and brake system to move the car at low speed when going downhill, allowing the driver to simply focus on steering and overcoming obstacles

5. TRACTION CONTROL SYSTEM - TCS

Automatically controls the vehicle's traction when on slippery or muddy terrain

7. HILL START ASSIST - HSA

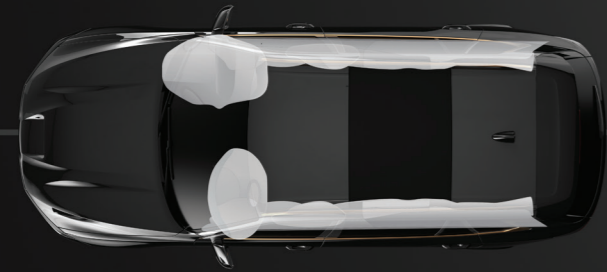

Automatically interferes with the brakes and reduces engine power, keeping the car from tipping over

8. ROLL OVER MITIGATION - ROM

Automatically interferes with the brakes and reduces engine power, keeping the car from tipping over corners at high speeds

9. 6-AIRBAG SYSTEM

Includes 2 airbags in the Driver's seat and the front passenger seat. Both having a front-side airbag and a curtain airbag, ensuring the complete safety of all persons in the vehicle in the case of a crash

11. 360-DEGREE CAMERA SYSTEM

Helps the driver feel secure when parking the car, and simultaneously assists in observing all surrounding details when the car is moving

10. BLIND SPOT MONITORING

Send warnings to the driver when there is a moving vehicle in the blind spot of the driver

12. LANE DEPARTURE WARNING

The intelligent driver assistance feature warns the driver when the vehicle begins drifting out of its lane
